Department of Examinations – Sri Lanka
February 2020

School Performance Indices G.C.E. (A/L) Examination – 2019 (New Syllabus)

The indices of performance prepared on the basis of ability demonstrated by pupils at public school examinations are presented by the Department of Examinations – Sri Lanka as a means of assessing school performance comparatively. Thus, indices prepared in respect of the G.C.E (A/L) Examination – 2019 (New Syllabus) are presented in this report.

For the convenience of the key users of these indices, the schools are listed by Subject Streams, Provinces and Districts. The highest performing schools in the island are listed first and the schools offering **less than 20 students** for the G.C.E (A/L) Examination are listed afterwards respectively, to make the comparison feasible.

These indices could be used for the following purposes.

- For using as a more dependable indicator of performance instead of arbitrary criteria such as number of pupils obtaining 3 Distinctions (3 "A"s)
- For obtaining information about placements of schools compared to the performance of the other schools in G.C.E (A/L) subject streams
- For comparing and categorising schools in terms of their performances.

- For gauging improvements in performance of schools annually.
- For identifying low performing schools for interventions of improving performance.
- For information of central and regional education authorities (such as Ministry of Education / Provincial Ministries of Education) to upgrade certain categories of schools.
- For identifying particular factors such as the performances of the school administrators and teachers when indices change, and other factors remain the same.
- For comparing the efficiencies of schools with respect to number of students, staffing etc. and to determine optimal allocations of resources.

I request all those involved in the process of education to make effective use of these indices for the above-mentioned purposes.

B. Sanath Pujitha
Commissioner General of Examinations

Computation of Performance Indices

The process of calculating performance indices takes several steps. It can be outlined as follows.

- i. The raw scores obtained by the students in each subject (except General English and Common General Test) are assigned "stanine values" according to the distribution of the marks in each subject. A description of the assignment of stanine values is given in Table 1 and illustrated in Figure 1.

Table 1: Student Achievement and corresponding stanine values

Normative description of achievement	Percentage of students	Stanine Value	Corresponding range of percentile ranks
Highest	4	9	96 – 100
Higher	7	8	89 – 96
High	12	7	77 – 89
Above Average	17	6	60 – 77
Average	20	5	40 – 60
Below Average	17	4	23 – 40
Low	12	3	11 – 23
Lower	7	2	4 – 11
Lowest	4	1	0 – 4

Figure 1: Percentage of students and corresponding stanine values

- i. The average of the stanine values assigned to three main subjects is computed and these computed values are categorised into subject streams concerning the combination of the three main subjects
- ii. Under each subject stream, these values are averaged separately for schools in order to obtain the performance of the school in that subject stream.
- iii. With the purpose of obtaining a rounded two-digit value, the averaged figures are multiplied by 10 and rounded off to the nearest integer. Based on these values for the schools in each subject stream, the schools were ranked in national, provincial and district levels
