School Performance Indices – G.C.E. (O/L) Examination – 2018

As a means of assessing performances of schools in public examinations comparatively, the Department of Examinations – Sri Lanka publishes the indices for performances of schools prepared on the basis of the ability demonstrated by candidates in public school examinations. The indices prepared for the G.C.E (O/L) Examination – 2018 are presented in this report.

For the convenience of the comparison and fairness, the schools are categorized into two groups: schools with 20 or more candidates and schools with less than 20 candidates. Reports are prepared separately for these two categories and the schools are listed according to the relevant province, district and education zone giving them ranks according to their performances in the levels of those regions and the Island using school performance indices.

In this report, indices and ranks are given for the schools with 20 or more candidates and the best performing schools in the island are listed first for the ease of identification.

Among many purposes of using these indices, the following can be considered the foremost

- For using as a more reliable indicator of performance instead of arbitrary criteria (for example number of candidates obtaining 9 'A' grades)
- For identifying the placement of schools in comparison with the performance of other schools in the G.C.E (O/L) examination
- For identifying the improvement or decline of performance of a school compared to the previous year in comparison with the other schools.

- For identifying low performing schools for interventions of improving performance.
- To categorize schools in terms of their performances.
- To create awareness of the performance of schools among central and regional education authorities (such as Ministry of Education / Provincial Ministries and Departments of Education) to conduct development programmes to upgrade low performing schools.
- To compare the efficiencies of schools taking into account the number of students, staffing etc. and to determine optimal allocations of resources.

I request all those involved in the process of education to make effective use of these indices for the above-mentioned purposes.

Computation for Performance Indices

The raw scores obtained by the school candidates who sat for the G.C.E. (O/L) Examination for the first time are considered in the computation for performance indices. The relevant process can be outlined as follows.

- i. 'Stanine value' are assigned for the raw scores of the subjects which all students are required to study according to the distribution of the marks in each subject. A description of the assignment of stanine values is given in Table 1 and illustrated in Figure 1.

Table 1: Student Achievement and corresponding stanine values

Normative description of achievement	Percentage of students	Stanine Value	Corresponding range of percentile ranks
Highest	4	9	96 - 100
Higher	7	8	89 - 96
High	12	7	77 - 89
Above Average	17	6	60 - 77
Average	20	5	40 - 60
Below Average	17	4	23 - 40
Low	12	3	11 - 23
Lower	7	2	4 - 11
Lowest	4	1	0 - 4

Figure 1: Percentage of students and corresponding stanine values

- ii. In order to obtain a numerical indicator for the performance of a school in each of the subjects which all students are required to study, the average of the stanine values relevant to that 'school and subject' is computed.
- iii. With the purpose of obtaining a rounded off two-digit value, the average value is multiplied by 10 and rounded off to the nearest integer. These values are considered 'performance indices for the subjects' of a particular school.
- iv. In order to compute the 'School Performance Index' which denotes the overall performance of a particular school, the average value of the 'performance indices of subjects' is computed and rounded off to the nearest integer.
